

Envirotabs

URINAL TABLETS

DESCRIPTION

- ENVIROTABS are the environmentally safe urinal and toilet block that does not contain Chlorobenzenes which can cause environmental damage.
 - ENVIROTABS have a five way cleaning and sanitising action that provide the toilet and urinal area with:- A proven germ killing disinfectant.
1. A bleaching and whitening agent that leaves no residual material and degrades into harmless by-products water and carbon dioxide, all found in nature.
 2. A long term deodoriser that not only masks malodours but absorbs and neutralises them.
 3. A heavy duty cleaner that emulsifies and floats all soilage away and yet is fully biodegradable.
 4. Prevents build up of uric acid encrustations.
- ENVIROTABS are only activated when moistened unlike Paradichlorbenzenes that dissolve in the atmosphere. The bleaching and disinfecting agents in ENVIRONCLEAN TABLETS are oxygen releasing (unlike chlorine based products) and ENVIROTABS actually breakdown to form carbon dioxide and water.
 - ENVIROTABS have very low toxicity and are completely safe to handle and cannot be absorbed through the skin or cause respiratory irritation.
 - ENVIROTABS are fully biodegradable and are completely environmentally responsible.

Service with products of technology

- ENVIROTABS have a long life and will last up to two weeks with normal flushing.
- ENVIROTABS with a lasting fragrance uses the latest technology to control and neutralise malodours by a process known as molecular encapsulation.

APPLICATION

Place tablets at each end of urinal for best results.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. PH 13 11 26. If swallowed do not induce vomiting, give a glass of water and seek medical advice. For eye contact, irrigate with water for 15 minutes and if irritation persists seek medical advice.
