

DECIMATOR P

PESTICIDE/HERBICIDE ORGANIC ODOUR ELIMINATOR

DESCRIPTION

DECIMATOR - P is an all purpose organic odour eliminator that eradicates organically based odours of pesticides/ herbicides by reacting with the odour causing molecules to form odourless and safe molecules.

DECIMATOR - P

Down through the ages men and women have disguised offensive odours by masking them with a perfume. However, through modern science, we now understand that offensive odours can adversely affect health and the environment.

There is an almost endless variety of offensive odours affecting our environment, most of which are a by-product of our modern industrial society. These odours whether offensive, toxic, or both, need to be successfully neutralised rather than just covered up.

How then does DECIMATOR - P convert toxic and offensive odours into safe and non-offensive molecules? This is achieved as DECIMATOR - P contains substances which have reactive groups available which readily react with the various toxic odours. By this means, new molecules are formed which do not have the toxicity and odour of the previous offensive ones.

BENEFITS

DECIMATOR - P is non-toxic, non-hazardous, non-flammable and biodegradable. It is non-staining and will show no adverse effects towards any materials even with prolonged treatment.

APPLICATION

No special precautions necessary beyond normal good occupational work practice. Recommended guideline for application to pesticide/ herbicide formulation is 10ml of DECIMATOR - P to 400 litre chemical solution.

DECIMATOR - P is completely safe. However it is not a personal spray nor should it be sprayed directly on to food or produce. It should be stored at temperatures less than 40°C under these conditions it has a shelf life of approximately 24 months.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. PH 13 11 26. For eyes, irrigate with water for 15 minutes and seek medical advice.

PACKAGING

DECIMATOR - P is available in 5 and 25 litre containers.
