

WASH 'N' WAX

LIQUID DETERGENT/POLISH

DESCRIPTION

WASH AND WAX is a concentrated low foaming detergent with good cleaning power combined with a blend of wax finishes which protect and beautify surfaces.

Whilst the detergent removes road grime and motoring soilage, a residue of wax (which protects surfaces from oxidation and dirt build up) enhances the gloss of the surface.

After the first treatment of WASH AND WAX, road grime builds up on the wax film and this makes dirt removal easier when next washing.

The wax coating will not build up on the surface as the wax film is removed when washed. On rewashing with WASH AND WAX a new coating of wax is formed to protect the surface.

APPLICATION

Add 30ml per 10 litre plastic bucket of cold or hot water and wash in the normal manner and chamois the surfaces dry.

WASH AND WAX can also be used through pressure cleaners and automatic car wash systems. WASH AND WAX can also be used as a floor cleaner and polish or through Automatic scrubbing machines. Add 200 ml (1 cup) per mop bucket for manual cleaning or 1 part - 40 parts water for use through Automatic Scrubbers.

WARNING

Avoid eye contact.

FIRST AID

If poisoning occurs contact a doctor of poisons information centre. PH 13 11 26. If swallowed do not induce vomiting, give milk or water and seek medical advice. If skin contact does occur remove contaminated clothing and wash thoroughly with water. For eye contact, irrigate with water for 15 minutes and if irritation persists seek medical advice.

PACKAGING

WASH AND WAX is available in 5, 15 and 25 litre containers.
