

CCA FLUSH

WATERLESS URINAL CLEANER / DEODORISER

DESCRIPTION

CCA FLUSH is a natural biological toilet, urinal and waterless urinal cleaner/deodoriser formulated for the safe removal of organic build-up and unpleasant odours.

CCA FLUSH eliminates the root cause leaving a clean fresh surface.

CCA flush is non-hazardous, biodegradable, eco-safe and user friendly.

BENEFITS

- CCA FLUSH is non hazardous and offers a safer occupational health environment than the alternatives of harsh acids, alkalis, oxidising agents and sanitisers all of which are harmful to operators, environment, and plant.
- CCA FLUSH safely assists degradation of waste matter where harsh caustic cleaners, acid cleaners, oxidising agents and sanitisers attack and kill the bacteria (that nature utilises for degradation of waste matter) resulting in offensive waste odours.

USES

CCA FLUSH is an ideal product for:

- Waterless urinal cleaning and deodorising

- User and eco safe toilet and bathroom cleaning and deodorising.

APPLICATION

Toilet Cleaning:

1. Foam or spray CCA FLUSH on to area leaving on the surface for 3-5 minutes.
2. After contact time lightly brush with a hard bristled brush.
3. Rinse with fresh water to leave a clean fresh surface.

Please Note – we recommend foaming as best practice as enable longer surface contact time.

Waterless Urinal Cleaning and Deodorising

1. Foam or spray TANGO over urinal, following cleaning procedures for the use of TANGO to remove calcium, other mineral salts and rust marks which can absorb odours.
2. Ensure all TANGO product is thoroughly rinsed off – any TANGO residue left can decrease the effectiveness of CCA FLUSH.
3. Remove drain grates then liberally foam product over urinal surfaces and foam product into the drain opening. Ensure a sufficient amount of product is foamed down the drain opening.
4. Leave for a minimum of 5 mins then flush with fresh water.

WARNING

Avoid eye contact.

WARNING

If poisoning occurs contact a doctor or Poisons Information Centre. PH 13 11 26. If swallowed do not induce vomiting, give a glass of water and seek medical advice. For eye contact irrigate thoroughly with water for at least 15 minutes.

PACKAGING

CCA FLUSH is available in 5 and 20 litre containers.
