

# SOLUTION 524

## WATERBASED GRAFFITI REMOVER

### PRODUCT DESCRIPTION

**SOLUTION 524** is a blend of powerful organic solvents and surfactants developed to remove gum and paint from porous surfaces such as brickwork, stone, terrazzo and concrete. It was formulated to meet the strict health and safety requirements of major Government Departments.

### PRODUCT APPLICATIONS

**SOLUTION 524** removes gum, paint, ink and permanent pen marks from porous surfaces such as brickwork, stone, terrazzo and concrete. It is also very effective on many other surfaces including desks, chairs, vinyl floors, carpets, tiles, aluminium, polyethylene play equipment (Do not use on clear perspex or lexan), old chewing gum “rings” on tiles and concrete, street signs and advertising boards.

Some of the applications in which **SOLUTION 524** is successfully being used

- Trains and buses for removal of graffiti from seats and all surfaces including windows and floors.
- Councils and schools for play equipment, especially plastic sections, (Recommended by play equipment suppliers)
- Phone booths for the removal of gum, texta pen marks and paint.
- Graffiti stripper Terrazzo Surfaces Bricks, Concrete, Terracotta and tiles.
- Gum removal from concrete, tiles, carpets, melamine and laminex surfaces for the removal of permanent inks, texta pen marks and stamp pad marks and graffiti removal.
- Street signs.
- Colour bond surfaces (Assessed by BHP/Lysaght as safe to use on their products).

### ENVIRONMENTAL FEATURES

- **WATER SOLUBLE** - safe disposal to waste system.
- **BIODEGRADABLE** - has a built in surfactant system to help keep ink and dyes in suspension and aids in breakdown of materials under natural conditions.

### UNIQUE PRODUCT FEATURES

**APPROVED BY** - Government Departments & Major Corporations.

**MULTI PURPOSE** - Wide ranging applications.

**EASY TO APPLY** - No special applicator required.

## HOW TO USE

**SOLUTION 524** is easy to apply, just spray or wipe on a small quantity and work into the area to be cleaned. When graffiti is removed wipe over the cleaned surface with water to remove any residual solvent. Porous surfaces are harder to clean and may require the gel version of this product to achieve the desired penetration. Leave in contact with the graffiti as long as possible, then use an abrasive of some description, i.e., scrubbing brush or pads to agitate the surface. In some instances it may be necessary to use high pressure water in conjunction with the product.

Whatever the surface being cleaned, be sure to wipe over with a wet cloth or flush the area with water when finished to remove any residual solvent. Use gloves, eye protection and protective clothing when applying **SOLUTION 524** as it will de-fat the skin (dry it out). Read the safety data sheet and follow all recommendations for safe handling.

## SAFETY FEATURES

**LOW TOXICITY MATERIALS** - Significantly reduces the handling danger to personnel.

**NON FLAMMABLE** - Does not contain any highly evaporative solvents.

**NO DANGEROUS VAPOURS** - Does not require user to wear breathing apparatus.

**SAFE TO STORE** - Removes storage hazards.

## WARNING

Avoid skin and eye contact and breathing vapours.

## FIRST AID

If poisoning occurs contact a doctor or poisons information centre. PH 13 11 26. If swallowed do not induce vomiting, give a glass of water and seek immediate medical attention. For eyes, irrigate with water for 15 minutes. If skin contact does occur remove contaminated clothing and wash skin thoroughly with water. For inhalation, remove patient to fresh air, lie down and rest and seek urgent medical attention.

## PACKAGING

**SOLUTION 524** is available in 5, 15, and 25 litre containers.
