

CHLORCLEAN

ALKALINE CLEANER AND SANITISER

DESCRIPTION

CHLORCLEAN is a heavy duty chlorinated alkaline detergent is a liquid specifically formulated for removal of fats and protein in food processing plants. CHLORCLEAN is an excellent detergent for removal of common soilage including greases, oils, fats and waxes, at high dilution rates. The antibacterial properties of CHLORCLEAN will destroy a wide range of organisms.

APPLICATION

CHLORCLEAN has been formulated for cleaning of food processing machine equipment and is ideal recirculating systems.

FEATURES and BENEFITS

- Softens water and prevents hard water deposits.
- Low foaming formulation.
- Free rinsing.
- Excellent penetration action to prevent redeposition occurring.
- Highly concentrated for economy in use.

DILUTIONS

For Recirculation Systems Daily Use

Use for a standard solution 15mls of CHLORCLEAN to 10L of hot water at 65-70 degrees Celsius. A cold water rinse is recommended prior to alkali wash and a hot water rinse after

GENERAL INSTRUCTIONS

CHLORCLEAN is effective in removing soils and fatty films at 70 °C. A final hot rinse (90 °C) is required to maintain a sanitary condition of the cleaned surfaces.

CAUTION : DO NOT use on sensitive metals such as aluminium and zinc.

PACKAGING

CHLORCLEAN is available in 25L, 200L AND 1000L containers.

SAFETY

Please refer to SDS for correct PPE, handling and storage instructions. For further information on the product call your local technical representative or our sales line on 08 9419 5577.
