

# RIM GUARD

## CORROSION INHIBITOR, COOLANT, SEALANT AND LEAK DETECTOR FOR TYRES

### PRODUCT DESCRIPTION

**RIM GUARD** is a multipurpose additive that prolongs tyre life by functioning as a corrosion inhibitor, tyre coolant, sealant and leak detector.

### FEATURES & BENEFITS

1. **RIM GUARD** contains an effective corrosion inhibitor which eliminates rusting of rims which saves in cleaning times after stripping and reduces the incidence of blocked valves.
2. **RIM GUARD** acts as a coolant and transfers heat thereby increasing tyre life and performance.
3. **RIM GUARD** increases tyre life as it protects against wear, separation and penetration damage. All of these incidents increase when tyres under inflated or overheat.
4. **RIM GUARD** identifies air leaks minimising time spent on maintaining correct tyre pressure.
5. **RIM GUARD** increases tyre life as it promotes an effective seal on the rim.

## **DIRECTIONS FOR USE**

**RIM GUARD** can be added to tyre prior to mounting or pumped into inflated tyres.

Recommended quantities per tyre are:

<i>Tyre Size</i>		<i>Litres of Rim Guard</i>

4000 x 57	49/50 x 57	57 litres
50/80 x 57	67/50 x 51	64 litres

The suggested rates ensure that adequate protection is provided from rust, corrosion, oxidation cooling & load sealing.

For severely damaged rims, extreme operating conditions or badly rusted rims the quantity may need to be increased up to 50% more.
