

CCA FLUSH

URINAL CLEANER & DEODORISER

Description

CCA FLUSH Urinal Cleaner & Deodoriser is designed to break down urine, grime and odours into their basic elements for a more effective clean. This includes mineral build-up of substances like calcium and lime. Its biodegradable, multi-function enzyme formula completely eliminates mess without leaving behind any residue.

Benefits

- ✓ Multi-function enzymes break down organic matter rather than moving mess around
- ✓ Eliminates odours at their source
- ✓ Breaks down both urea and uric acid crystals
- ✓ Can be safely disposed of down drains, where it will continue to break down organic matter
- ✓ Biodegradable
- ✓ pH neutral
- ✓ Non-corrosive

Where to Use

- ✓ Suitable for use in waterless and water flushing urinals as well as drains and septic tanks.
- ✓ Used to remove odours from cat urine, dog urine and human urine.

Directions

Spray the surface to be cleaned with CCA FLUSH. Let the product stand for 5-10 minutes so as to get to work on the urine and uric crystals. For old uric crystal build-up, use a hard brush or no scratch pad to remove build-up. Once all the old uric crystals have been removed, a maintenance routine of spray and wipe can be followed.

Drains

Urinal Cleaner and Deodoriser can be poured into drains to remove odours. The recommended dosage is 200ml per application. If there are multiple drains, product must be applied to all drains.

Warning

Avoid eye contact.

First Aid

If poisoning occurs contact a doctor or Poisons Information Centre. PH 13 11 26. If swallowed do not induce vomiting, give a glass of water and seek medical advice. If skin contact does occur remove contaminated clothing and wash thoroughly with water. For eye contact, irrigate with water for 15 minutes and if irritation persists seek medical advice.

Packaging

CCA FLUSH is available in 5 and 15 litre containers.
