

PARTSOLVE

DEGREASING OF COMPONENTS

Description

PARTSOLVE is a blend of high flash paint solvents, wetters and emulsifiers formulated for safe and effective cleaning of mechanical components in parts washing machines or soak baths.

Benefits

- ✓ Heavy duty degreasing properties
- ✓ Safe on metal surfaces
- ✓ Fast and effective

Where to Use

Parts washing machine solvent for heavy degreasing

Directions

SPRAY WASH MACHINES

Add to machine sump as required. Activate pump and brush or agitate components whilst directing PARTSOLVE onto components. Allow to drain dry or rinse with water depending on requirements.

SOAK TANK

Add PARTSOLVE to tank and immerse component to be cleaned. Allow sufficient soak time before removing and water blasting or water rinsing component.

GENERAL PARTS CLEANING

Clean component by agitating with a brush dipped in PARTSOLVE. Complete cleaning by rinsing with high pressure water.

Warning

Avoid skin and eye contact and ignition sources. PARTSOLVE is combustible.

First Aid

If poisoning occurs, contact a doctor or Poisons Information Centre. PH 13 11 26. If swallowed do not induce vomiting. Give a glass of water. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor. If skin contact occurs, remove contaminated clothing and wash skin thoroughly.

Packaging

Partsolve is available in 25 and 200 litre drums.
