

TITAN

OVEN, GRILL & HOT PLATE CLEANER

Description

TITAN is a heavy duty cleaner formulated for cleaning of ovens, grills, hot plates and other cooking appliances. Titan is a highly concentrated blend of Potassium Hydroxide and Sodium Hydroxide allowing fast removal of grease and baked on carbon deposits.

Benefits

- ✓ High concentrated extra strength formula
- ✓ Rapidly removes heavy grease and baked carbon deposits
- ✓ Wetting agents to penetrate and remove baked on deposits.

Where to Use

Oven and grill degreaser and cleaner.

Directions

Titan can be brushed, poured or foamed onto surfaces. Apply neat.

Apply TITAN neat to a warm but NOT HOT surface. Spread TITAN evenly over the surface, allow contact time of a few minutes and remove with a scraper, cloth or scourers. For heavy deposits re-treatment may be required or scouring with a griddle pad. Wash with water after cleaning.

For Vertical surface cleaning TITAN may be applied by a foam nozzle gun, swab or paint brush. Allow to stand before wiping or rinsing residues away.

Challenge representatives can advise you on the correct dosing/dispenser system for your requirements.

Warning

Avoid skin and eye contact. Wear rubber gloves and eye protection when using this product.

First Aid

If poisoning occurs contact a doctor or Poisons Information Centre. PH 13 11 26. If swallowed do not induce vomiting, give a glass of water and seek medical advice. For eye contact, irrigate with water for 15 minutes. If irritation persists seek medical advice.
