

PRIMARY ACIDIC SOLUTION

LOW FOAMING ACIDIC LIQUID WITH ACTIVE SANITISER

DESCRIPTION

PRIMARY ACIDIC SOLUTION is a low foaming acidic detergent with active sanitiser REWOCID® WK 30. Formulated for use of removing calcium, scale and suspension of soils. Ideally suited for the use in recirculated systems. PRIMARY ACIDIC SOLUTION contains a blend of liquid acids, low foaming wetting agents and sanitising power to provide fast effective results.

FEATURES AND BENEFITS

- Low Foaming
- Active sanitiser **REWOCID® WK 30** for a wide spectrum of efficacy.
- Free rinsing
- Highly concentrated for use cost effectiveness
- Excellent penetration action to prevent redeposition occurring.

DILUTIONS

For Recirculation Systems

Use for a standard solution 20mls of Primary Acidic Solution to 10L of hot water at 85-95 degrees Celsius. A cold water rinse is recommended prior to acidic wash and a hot water rinse after.

PACKAGING

PRIMARY ACIDIC SOLUTION is available in 25L, 200L AND 1000L containers.

SAFETY
